PROFESSIONAL SUMMARY

Dynamic Salesforce Developer Intern at Smartbridge, proficient in Apex and Lightning Web Components. Skilled in automating business processes and crafting secure data models. Experienced in data analytics with Power BI, showcasing strong problem-solving abilities and a foundation in AI and Cloud technologies. Excels in collaborative environments, driving impactful solutions.

SKILLS

Data Structures

Java

Python

Artificial Intelligence

Machine Learning

Generative AI

SQL

Frontend Development

Data Science

Data Analyst

Salesforce CRM

Google Cloud

AWS

Power BI

IOT

C++

EXPERIENCE

AI & CLOUD INTERN - Edunet Foundation (AICTE)

- Completed a 4-week internship leveraging the **IBM Cloud Platform** in emerging technologies.
- Explored fundamental concepts of **Artificial Intelligence (AI)** and **Cloud computing**, studying their application for scalable solutions.

SALESFORCE DEVELOPER INTERN - Smartbridge

- Earned the **Salesforce Certified Agentforce Specialist** credential by mastering platform fundamentals, **Apex** programming, and **Lightning Web Components (LWC)**.
- Automated complex business processes and designed secure data models, validated by achieving the **Apex Specialist** and **Object Relationships** Superbadges.

DATA ANALYTICS INTERN - Vodafone Idea Foundation (VOIS for Tech)

- Completed a virtual internship focused on **data analysis** and **visualization** implemented by Connecting Dreams Foundation.
- Gained practical experience using **Microsoft Power BI** to develop interactive dashboards and reports for business intelligence.

FRONTEND DEVELOPMENT INTERN – Edunet Foundation(AICTE)

- Successfully completed a 6-week internship using the **IBM SkillsBuild platform**.
- Acquired foundational skills in core web technologies including **HTML, CSS, and JavaScript** to build responsive web pages.

EDUCATION

BACHELOR OF TECHNOLOGY – BTECH IN CSE (IOT) CANDIDATE

Kakatiya Institute of Technology And Science,

CERTIFICATIONS

- Oracle Cloud Infrastructure Generative AI Professional Certificate
- Google Cloud Computing Foundations
- Servicenow IT Leadership Professional Certificate
- Programming in Java by NPTEL
- Cisco Python Essentials
- Salesforce Certified Agentforce Specialist
- Career Essentials In Generative AI by Microsoft and LinkedIn
- Programming in Java by GreeksforGreeks
- IBM SkillsBuild AI & Data Science
- Core Concepts Of C++ by Devtown

PROJECTS

Automatic Fire-Fighting Robot | IoT, Arduino, C++, Blynk, Sensors

Engineered an autonomous robot that detects flames via IR sensors, navigates to the source, and extinguishes them with a water pump.

Integrated IoT for real-time remote monitoring and manual control through a Blynk mobile app dashboard.

Programmed the robot's core logic and motor control in C++ on an Arduino microcontroller.

HandsMen Threads: Salesforce CRM Strategy

Architected a hypothetical Salesforce implementation for a luxury e-commerce brand to enhance customer personalization and operational efficiency.

Mapped solutions using Service Cloud (360° customer view), Marketing Cloud (targeted campaigns), and Commerce Cloud (AI recommendations).
