Professional Summary

Computer Science undergraduate with internship experience in Artificial Intelligence, Machine Learning, Data Science, Salesforce, and Software Development. Proficient in Python, Java, SQL, and JavaScript, with hands-on experience in machine learning model development, data preprocessing, Retrieval-Augmented Generation (RAG), Salesforce application development, and RESTful application development. Strong foundation in Data Structures and Algorithms, Object-Oriented Programming, Database Management Systems, and Software Engineering, with a passion for building intelligent, data-driven software solutions.

Technical Skills

Programming Languages: Java, Python, SQL

Artificial Intelligence & Machine Learning: Machine Learning, Retrieval-Augmented Generation (RAG), LangChain, Prompt Engineering, Feature Engineering, Model Evaluation, Data Preprocessing

Data Analytics: Pandas, NumPy, Data Cleaning, Exploratory Data Analysis (EDA), Power BI

Frontend: HTML5, CSS3, Javascript, React, Bootstrap

Backend: Node.js, Express.js, REST APIs

Salesforce: Apex, SOQL, Lightning Web Components (LWC), Flows, Service Cloud, Profiles, Permission Sets

Cloud Platforms: Oracle Cloud Infrastructure (OCI), Google Cloud Platform (GCP), IBM Cloud

Experience

AI & Machine Learning Intern — Infosys Springboard

🔍 [Verify](#)

- Developed end-to-end machine learning workflows including data preprocessing, feature engineering, model training, and evaluation using Python.
- Implemented supervised learning algorithms and evaluated model performance using accuracy, precision, and recall metrics.
- Worked with structured datasets to analyze patterns and improve predictive model performance.
- Translated real-world problem statements into structured machine learning solutions and documented analytical findings.

Full Stack Development Intern — SmartBridge Foundation

🔍 [Verify](#)

- Designed and developed backend services using Node.js and Express.js following RESTful architecture principles.
- Built CRUD APIs with request validation, modular routing, and centralized error handling.
- Integrated MongoDB for persistent data storage and optimized database queries for improved API performance.
- Collaborated with team members using Git and GitHub while debugging backend issues and improving application stability.

- Developed Salesforce applications using Apex, SOQL, Lightning Web Components (LWC), and Flows.
- Implemented automation workflows and optimized SOQL queries while following Salesforce governor limits.
- Configured profiles, permission sets, and object relationships to support business workflows.
- Debugged Salesforce applications and resolved functional and data consistency issues.

Green Intern (Salesforce & Tableau) — 1M1B Foundation

- Worked with Salesforce datasets and validated data integrity for reporting and visualization.
- Developed Tableau dashboards to visualize KPIs and sustainability metrics.
- Performed data cleaning and transformation to improve reporting accuracy.
- Presented analytical findings to support business decision-making.

AI & Cloud Intern — Edunet Foundation

- Built an AI chatbot using IBM Watson Assistant on IBM Cloud.
- Designed intents, entities, and dialog flows to automate user interactions.
- Applied AI-as-a-Service concepts for intelligent query handling and conversational workflows.

Data Analytics Intern — Vodafone Idea Foundation

- Performed data cleaning, preprocessing, and exploratory data analysis (EDA) on structured datasets.
- Developed Power BI dashboards to visualize KPIs and customer behavior trends.
- Generated analytical insights to support data-driven decision-making.

Projects

SwiftVisa – AI Visa Eligibility Screening Agent

- Developed an AI-powered visa eligibility screening system using Retrieval-Augmented Generation (RAG).
- Integrated LangChain with Google Gemini API to generate contextual eligibility assessments.
- Implemented semantic document retrieval using vector embeddings for accurate information retrieval.
- Designed rule-based validation logic to improve eligibility assessment reliability.

Customer Churn Prediction

- Built customer churn prediction models using Logistic Regression and Random Forest algorithms.
- Performed data cleaning, exploratory data analysis (EDA), feature engineering, and model training.
- Evaluated model performance using accuracy, precision, and recall metrics.
- Analyzed key customer behavior patterns to support retention strategies.

HandsMen Threads CRM Solution

- Developed a Salesforce CRM solution to streamline customer and service management workflows.
- Configured custom objects, automation, profiles, permission sets, and object relationships.
- Developed Lightning Web Components (LWC) and optimized SOQL queries for efficient data retrieval.
- Implemented Salesforce best practices to improve automation and usability.

Social Media Platform

 [Repository](#)

- Built a full-stack social media application using the MERN technology stack.
- Implemented user authentication, post management, likes, comments, and profile management using RESTful APIs.
- Integrated React frontend with Express backend and MongoDB database.
- Designed modular backend architecture with middleware-based authentication and CRUD operations.

Arduino Based Fire Fighting Robot

 [Repository](#)

- Designed an autonomous fire-fighting robot capable of detecting and extinguishing flames.
- Integrated flame sensors, Arduino Uno, motor drivers, and water pump modules.
- Implemented sensor-based navigation and automatic fire suppression logic.
- Validated hardware integration through prototype testing and performance evaluation.

Education

Bachelor of Technology in Computer Science Engineering
Kakatiya Institute of Technology and Science (KITS), Warangal

Oct 2022 – May 2026

Certifications

Salesforce Certified Agentforce Specialist

 [Verify](#)

Oracle Cloud Infrastructure Data Science Professional

 [Verify](#)

Oracle Cloud Infrastructure Generative AI Professional
